# Policy Page

---

### TERMS

All invoices due Net, 30 days.

1% Cash Discount, 10 days.

### FREIGHT

Freight is prepaid. There will be a stop charge based on the price of diesel fuel. Job-site deliveries will be looked at on a specific job basis.

### PAST DUE ACCOUNTS

All past due accounts will be subject to a monthly service charge.

No cash discounts will be allowed on past due accounts.

### DAMAGED GOODS, SHORTAGES, AND SHIPPING ERRORS

Merchandise should be inspected upon delivery.

Damaged and shorted goods must be noted on the shipping ticket.

### RETURN POLICY

- All returns must be accompanied by an "Authorization to Return".
- Credit will not be issued if "Authorization to Return" is over 90 days old.
- Credit requests must be made within thirty (30) days.
- Full credit to be issued for any shipping error by Chicago Lumber.
- Approved credit will be issued at full invoice minus 15% restock and 5% freight for any stock items that are returned in good, salable condition.
- Special ordered product is not eligible for return.
- Manufactured product is not eligible for return.
- Modified product is not eligible for return.

### PRICING

Pricing is subject to change without notice.

Any price changes will be reflected on a faxed confirmation.

### ORDER PROCEDURES

Faxed orders are requested, specifically special order, manufactured, and modified orders.

## Section 2 - Therma-Tru

---

Chicago Lumber is pleased to announce the release of **E-Catalog**, our new Therma-Tru quoting system. This system allows effortless quoting of the full-line of Therma-Tru door styles in a format that is easy to understand and use. It can be tailored to reflect your needs, such as including your company logo and your contact information. This will allow you to present a professional and complete quote to your customer.

**E-Catalog** shows the Chicago Lumber list price, but you can customize the pricing by adjusting your selling multipliers. This system shows building and component standards, as well as dimensions. Moreover, because it is computer based, updates to the program, including changes in door styles and pricing, will be automatic. For ease of ordering, quotes can be e-mailed to Chicago Lumber with a PO attached when you are ready to order.

---

As a result of the **E-Catalog** release, the following changes are effective immediately:

- All Therma-Tru pricing will generate from the **E-Catalog** quote system
- All Therma-Tru pricing will be removed from the Chicago Lumber on-line catalog
- Handing and dimensional information will remain in the Chicago Lumber on-line catalog
- Your net multipliers on Therma-Tru products are revised:
  - Traditions: **Contact Office**
  - All Other Styles: **Contact Office**
- An updated dealer net pricing sell sheet has been posted to the Chicago Lumber website

Training on **E-Catalog** is available and will be scheduled by your sales representative.

### To download **E-Catalog**:

- Download the setup:  
New Install: <https://millworkdevelopment.com/chicagolumber2/setup.exe>
- Once it is downloaded, run the setup file
- Follow the prompts for the initial setup of the program

Please contact the Chicago Lumber office with any questions or concerns. Thank you.

Door Slab Specifications

All Measurements are from Top of Slab on a 6-8 Door

<b>4" Hinge Pocket (To Top of Hinge)</b>		<b>Slab Height</b>	79-1/8"
Top	8-1/4"	<b>Backset</b>	
Center	38"		
Bottom	67-3/4"		
<b>Strike (To Center)</b>		2-10 and Narrower Doors	2-3/8"
		3-0 and Wider doors	2-3/4"
<b>Bore Location (To Center)</b>			
Handle	44"		
Deadbolt	38-1/2"		

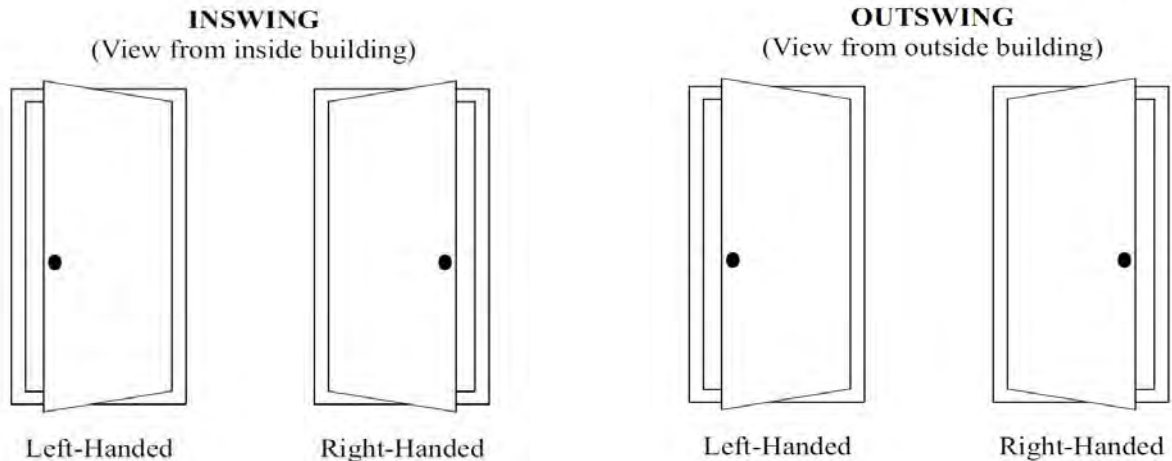

Therma-Tru Standard Hinge Locations

Door Height	Hinge Locations			
	Hinge 1	Hinge 2	Hinge 3	Hinge 4
6/6	8.250	38.000	67.750	N/A
6/8				
7/0		40.000	71.750	
8/0		33.250	58.750	

## Handing Diagrams

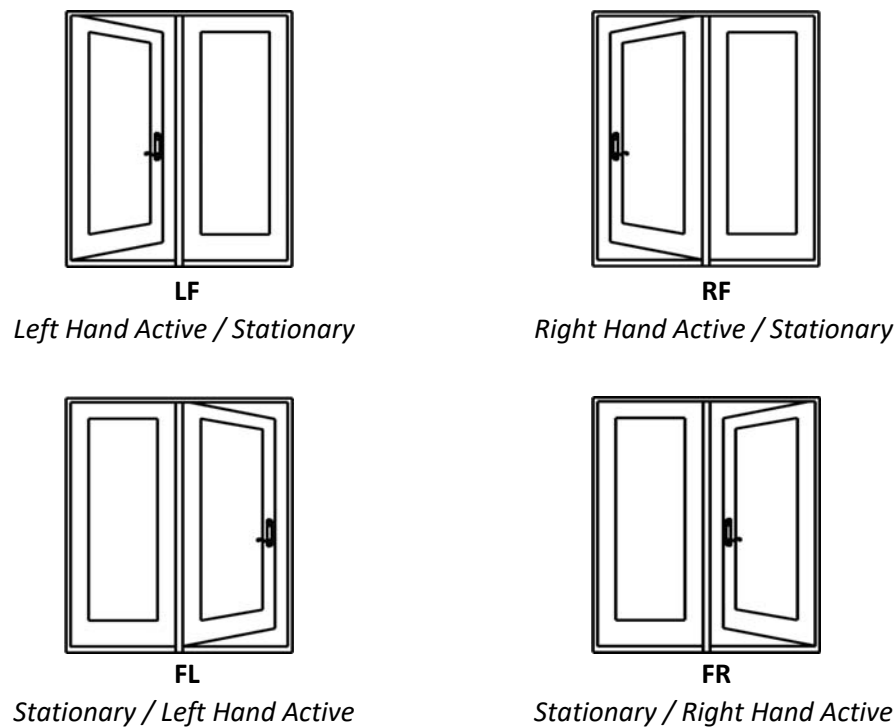

### Single and Double Door Handing

Double door active panel is denoted the same way as a single unit; the astragal is on the passive door.

### Hinged Patio Door Handing

#### As Viewed from the Exterior

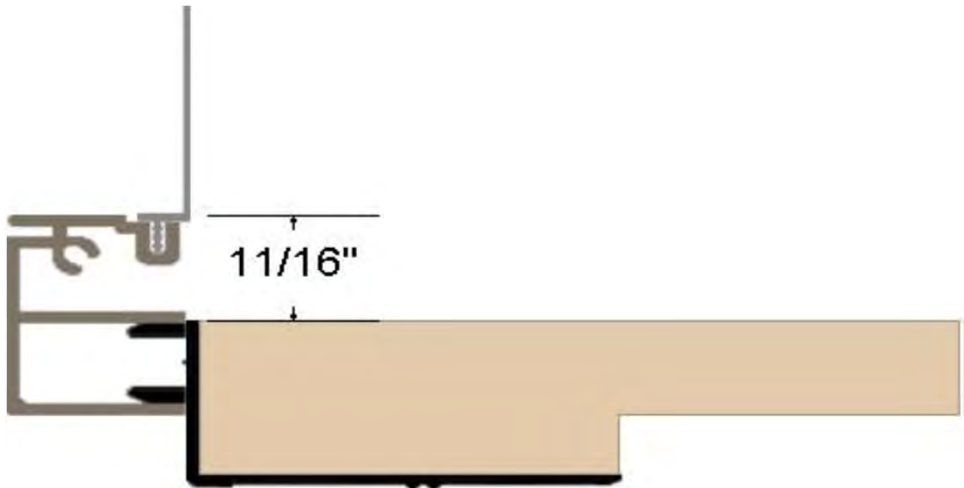

## Important Additional Information

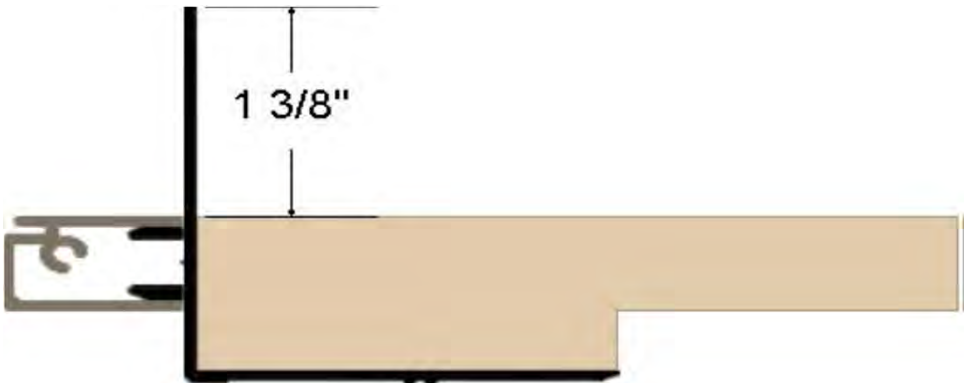

1. All dimensions are accurate only for full systems door units using genuine Therma-Tru components.
2. There is no allowance in any of the height dimensions for a carpet shim - please add accordingly.
3. Brick openings are 2-3/4" wider and 1-1/2" higher than actual unit size.
4. For 7' doors, add 4" to the actual unit size.
5. Rectangular and elliptical transoms are 13-1/2" in height - please add accordingly.
6. Do not store prehung units outside.
7. Not all door options are available in all the above listed sizes, swings and sidelite systems.
8. Due to ongoing product development, Therma-Tru Corp reserves the right to make changes in design, materials and specifications without notice.

## FINISH WARRANTY & MAINTENANCE

### Pre-Finish Services (Limited 1 Year Warranty)

Livingston painting Inc., & Chicago Lumber Co. provide a limited warranty to the original owner for one year from the date of the original dealer invoice as long as proper installation, care, and maintenance guidelines are followed. This warranty covers defects in material and workmanship that may unreasonably affect a finish's performance, including, but not limited to, the following:

☐Cracking      ☐Peeling and/or checking      ☐Chalking and/or blushing

#### This Warranty Does Not Cover:

- Bleaching
- Color variation due to graining
- Factory or field finished frames; including glass / insert frames
- Painting of exterior wood frames

#### Discoloration due to:

- Yellowing
- Fading
- Environmental conditions

Dark colored stains will sometimes appear as blotchy; also dark pigment paints and stains will fade over time, this is not covered under this warranty. This warranty is for the coating only and applies only if the coated product is used for the specific purpose for which it is intended.

**Great care is taken to blend color standards, but variations are due to occur with the graining and hue of each individual piece of wood and fiberglass. The color of finished product will vary due to a number of characteristics inherent to wood and fiberglass including: species, solid vs. veneer material, grain pattern, and density.**

Your entry door's finish will require some simple, periodic maintenance to keep it looking great and provide proper protection against the elements. Regular finish maintenance is a requirement of this warranty.

Livingston Painting Inc.'s maximum liability is the re-finishing price of the existing product; installation, and maintenance costs are not covered by this warranty.

THE WARRANTY SPECIFICALLY EXCLUDES ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. BUYER'S SOLE AND EXCLUSIVE REMEDY FOR DAMAGES IS EITHER REPAIR OR REPLACEMENT OF THE PRODUCT AND SELLER SPECIFICALLY EXCLUDES ANY DAMAGES INCLUDING, BUT NOT LIMITED TO, CONSEQUENTIAL OR INCIDENTAL DAMAGES.

**\*\*Warranties are non-transferable\*\***

### Maintenance

1. Dirt and watermarks can build up on the surface of your finished door over time. Extend the life of the stain and top-coat by cleaning the door several times a year. Clean with warm soapy water, rinse, and towel dry.

2. All exterior finishes are affected by exposure to sun, weathering, moisture, and air pollutants. Typical durability of the topcoat is 1–3 years depending upon site-specific conditions. When the gloss has decreased or the topcoat feels rough, it's time to reapply a new layer of topcoat.

# LARSON

2025 DEALER CATALOG

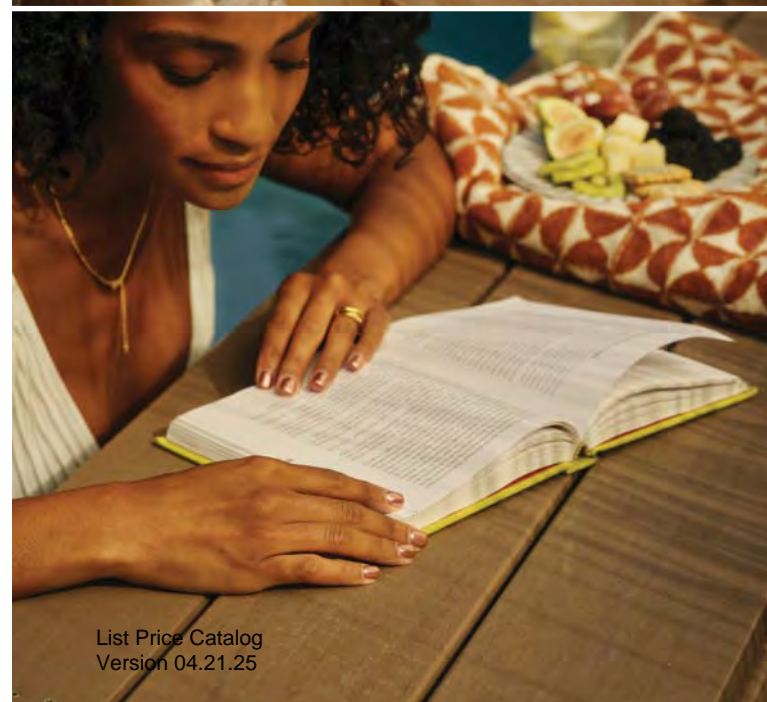

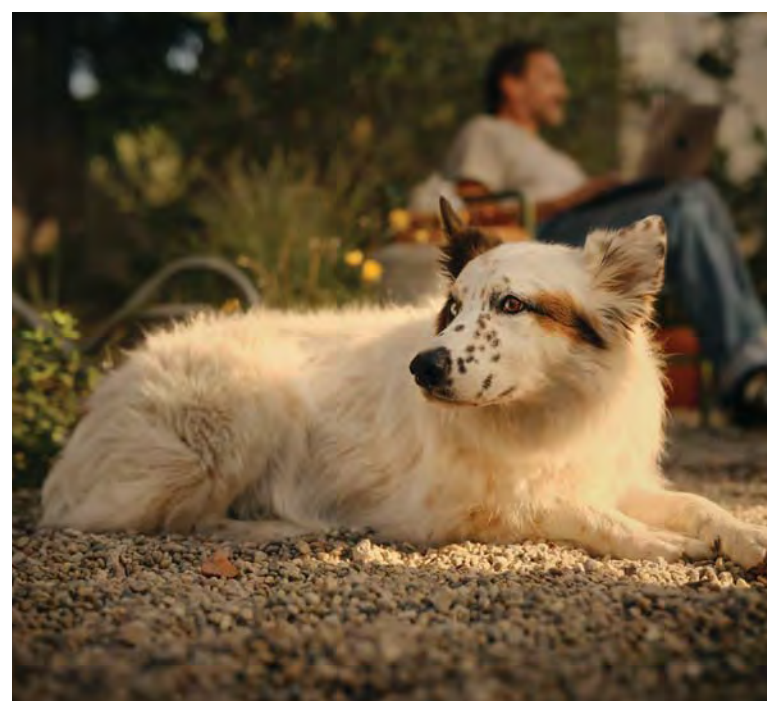

## Manifest your outer home.

**For more than 70 years,  
homeowners have turned  
to Larson to protect  
and enjoy their homes  
with our high-quality,  
high-performance  
home solutions.**

As America's trusted storm door brand, we are committed to inspiring better living at every threshold. A Larson storm door is so much more than a door — it's a simple addition that elevates your entryway into a place of comfort, safety and style. Whether you're sitting on your porch or walking through your foyer, you can let the best of nature in while keeping the worst of it out.

# 2025 New Products & Innovations

## The best view money can buy.

The **new** 150 Maximum View gives you the best view you can get from a storm door. Our largest window opening features a solid panel of tempered glass for an unobstructed view and maximum natural light.

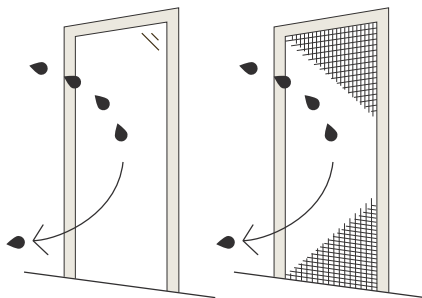

Listen for the click as SureLatch™ magnetic technology helps your door close with a smooth, confident latch for years to come.

Maximum view doors deliver 5% more view than similar models.

### New Storm Door Options<sup>1</sup>

#### NEAT+™ LOW-E GLASS

Designed for less cleaning, Neat+ coating fills the tiny pores in glass to create an exceptionally smooth surface that quickly and evenly disperses water to wash away debris and help prevent watermarks.

#### BETTERVUE® SCREEN

Wicks away water and grime for a clear view.

### New QuickFit™ Handleset Finish

Curved QuickFit handleset  
now available in Matte Black.

### New Frame Color

Bordeaux<sup>1,2</sup>

<sup>1</sup>Currently only available on 150 Maximum View.

<sup>2</sup>Available Q3 2025

Note: Product finish colors are approximate; actual finish colors may vary. See your Larson seller or visit [larsondoors.com](http://larsondoors.com) for details on limited warranties and exclusions.

# Find Your New Storm Door

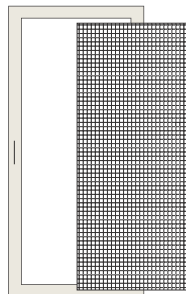

Create the entry that matches your lifestyle from our wide selection of storm doors. Whether you want extra protection for your home, more fresh air and natural light, or freedom for your pet, we have the right door for you.

## VENT OPTIONS

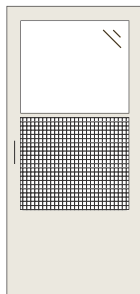

### Retractable

Built-in screen offers fresh air or clear views at your fingertips.

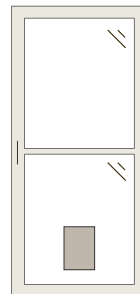

### Interchangeable

Included screen opens your home to the best of each season.

### Standard Venting

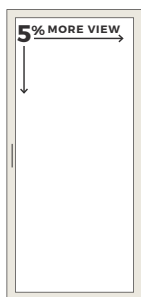

Built-in screen stays in the window for convenient ventilation.

### Pet Door

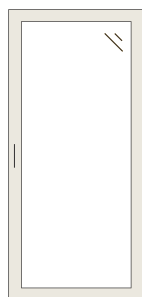

Pre-installed pet door lets your pet come and go as they please.

## VIEW OPTIONS

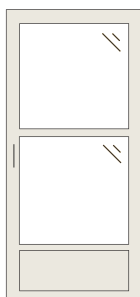

### Maximum View

Our largest window opening for maximum natural light.

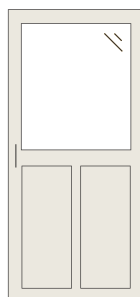

### Fullview

The full door is a window with only a frame surrounding it.

### Midview

Most of the door is a window with a small panel at the bottom.

### Highview

The door is half window, half panel for extra privacy.

## CLOSER OPTIONS

Reliable open and close with premium hold-open options.

## EXCLUSIVE INNOVATIONS

SureLatch<sup>™</sup> magnetic technology helps securely latch your door every time.

Maximum view doors deliver 5% more view than similar models.

# Measuring Guide:

## PLATINUM STORM & SECURITY DOORS

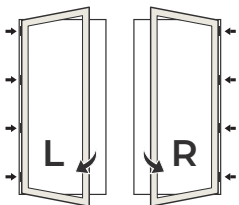

The Platinum Collection features our easiest storm door installation system. Use the diagram on the right to record your measurements as shown. If the width measurements vary, record the smallest measurement.

### SURFACE MOUNT

The rails mount directly to the face of the exterior door trim and require 3/4" of clearance on each side and up to 1" of clearance above the opening.

Construction styles may vary.

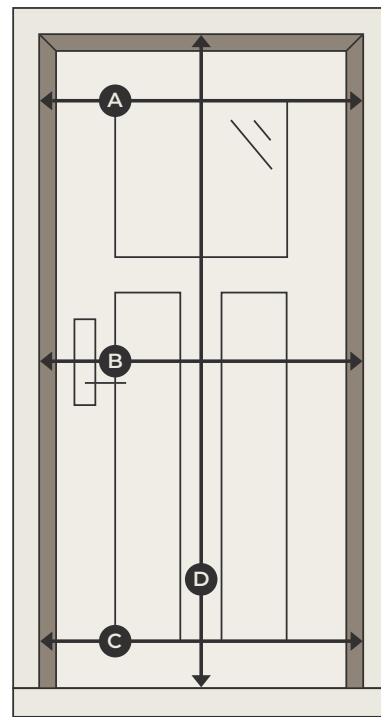

### PRE-HINGED FOR EFFORTLESS INSTALLATION

Select **L** (left-hinge) or **R** (right-hinge) as viewed from outside when ordering.

Look for this icon.

### RECORD MEASUREMENTS

<b>A</b>	Width	<b>C</b>	Width
<b>B</b>	Width	<b>D</b>	Height

### SPECIFY WHEN ORDERING:

- A.** Model Number
- B.** Color
- C.** Required Opening Size (Width x Height)
- D.** Platinum Hinge Side (LH or RH)

DOOR OPENING	MIN. WIDTH	MAX. WIDTH	MIN. HEIGHT	MAX. HEIGHT
32" x 81"	31-7/8"	32-3/8"	80"	81"
36" x 81"	35-7/8"	36-3/8"		

Note: Standard size availability varies by model. Custom size doors are made to fit opening size ordered. Custom doors have extended, variable lead times. Once placed, custom orders cannot be canceled. Shims may be required in certain installation applications.

Fullview with Low-E/Clear

# Measuring Guide:

## STORM DOORS

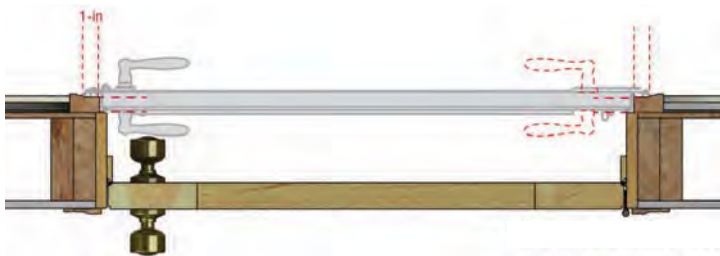

Use the diagram below to record your measurements as shown.

If the width measurements vary, record the smallest measurement.

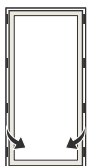

For Platinum Collection installation, please see page 18.

## RECESS MOUNT

The rails mount inside the opening and require a 1" wide by 1" deep mounting surface.

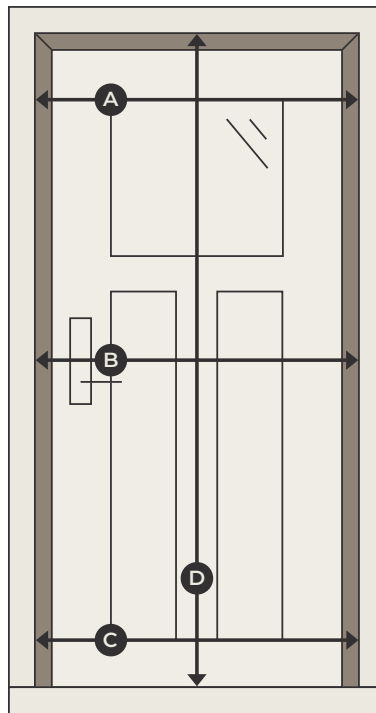

Construction styles may vary.

## UNIVERSAL HINGING

Allows for left-hinge or right-hinge installation.

## RECORD MEASUREMENTS

A	Width	C	Width
B	Width	D	Height

\*370-84 is not available in Sandstone or custom sizes.

# Measuring Guide:

## EXISTING FRENCH DOOR OPENING

1. Measure full width of opening from jamb exterior trim where storm doors will attach to the trim.
2. Measure full height of opening from head exterior trim to threshold where storm doors will attach.
3. Compare your dimensions with the standard French storm door opening size guide. If your opening does not match a standard, you need custom French doors.

**Note:** Continuous wood shims up to 1/4" thick can be installed behind both hinge mounting rails, allowing a given width of standard doors to fit an opening 1/2" wider. Extra long screws will be needed to secure.

With a French door installation, you will have one left-hinge door and one right-hinge door. The astragal included in your French door kit replaces the latch side mounting rail included with each door. The full width drip cap included in the French door kit replaces the top drip caps included with the doors.

See pages 46–48 for size range per series.

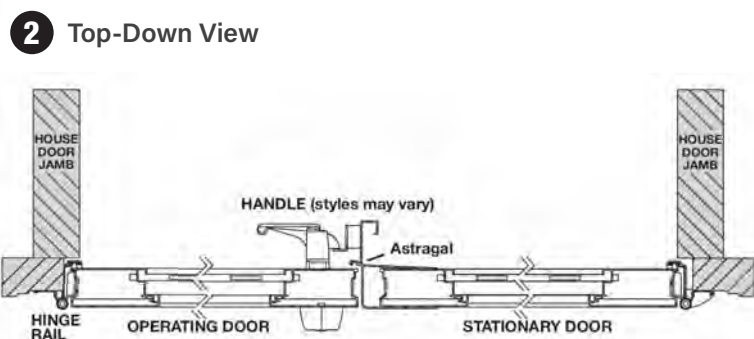

## ORDERING FRENCH DOOR UNITS

**Standard Sizes:** Order two standard size doors and a standard size French door kit.

**Custom Sizes:** Measure the true opening size of the entry and order the doors as **one** custom French door configuration with that measurement in inches. (For example, 73" x 84") Use the same measurement to order a French door kit separately.

## TYPICAL LARSON® STORM DOOR FRENCH DOOR INSTALLATION

Kit parts, instructions and astragal vary by model.

## FRENCH DOOR KIT

With our French door conversion kits, Larson storm doors are easily adapted for double door entry applications. Each kit includes detailed installation instructions, all necessary hardware, astragal and special drip cap. Refer to French door size guide for proper selection of French door conversion kits. **Inactive handleset available on select models (sold separately).**

# Security Storm Doors

## Guardsman Collection

### BE READY FOR LIFE WITH LARSON

The Guardsman Collection offers a complete line of steel security doors engineered to protect what matters most without sacrificing style and ease of use.

**Welded-steel frame** safeguards entry with industrial-grade protection.

**Tempered safety glass** protects entry from weather.

**7-in reinforced hinges** provide a secure mount.

**Anti-removal vault pin** is shielded within door to resist tampering.

## TOO MANY KEYS?

Provide your own hardware so you can open your entry and security doors with the same key.

Select standard entry door hardware with a 2-3/8" backset and a 2-1/8" hole diameter.

## Lock Box Location

### STANDARD:

Hardware location for Guardsman doors are figured from the top of the opening down to the center of the lever/knob which is mounted in the top hole of the lock box. Based on a standard 81" door this measurement is 38".

### CUSTOM:

When ordering, indicate the distance from the top of the door opening to the center of the lock box.

Allowable location is center of the door based on the centered ordered opening height + or - 12".

**Example:** Opening Height: 83"  
Center of Door: 41-1/2"

**Maximum Height:** 53-1/2" ( $41-1/2" + 12" = 53-1/2"$ )

**Minimum Height:** 29-1/2" ( $41-1/2" - 12" = 29-1/2"$ )

### ACCESSORY ADD-ONS<sup>1</sup>

PRODUCT OPTIONS	FRAME COLORS & SIZES	ADD PER UNIT
<b>Custom Lock Box Heights</b> Provide measurements when ordering – see above.	Order Custom Sizes	<b>\$80.85</b>

36"	35-7/8" – 36-3/8"	

# Security Round Top Styles

## Guardisman Collection

The Guardsman Collection features two styles in a round top configuration. These doors feature tempered safety glass and include a pneumatic closer and wind chain. Unlike standard security doors, round top doors require more complex installation; professional installation is recommended.

**Delivery:** Expect extended lead times from the day the order is placed and template is approved.

**Installation:** Framing includes three pieces and requires a professional installation for on-site adjustments.

# Retractable Screen Products

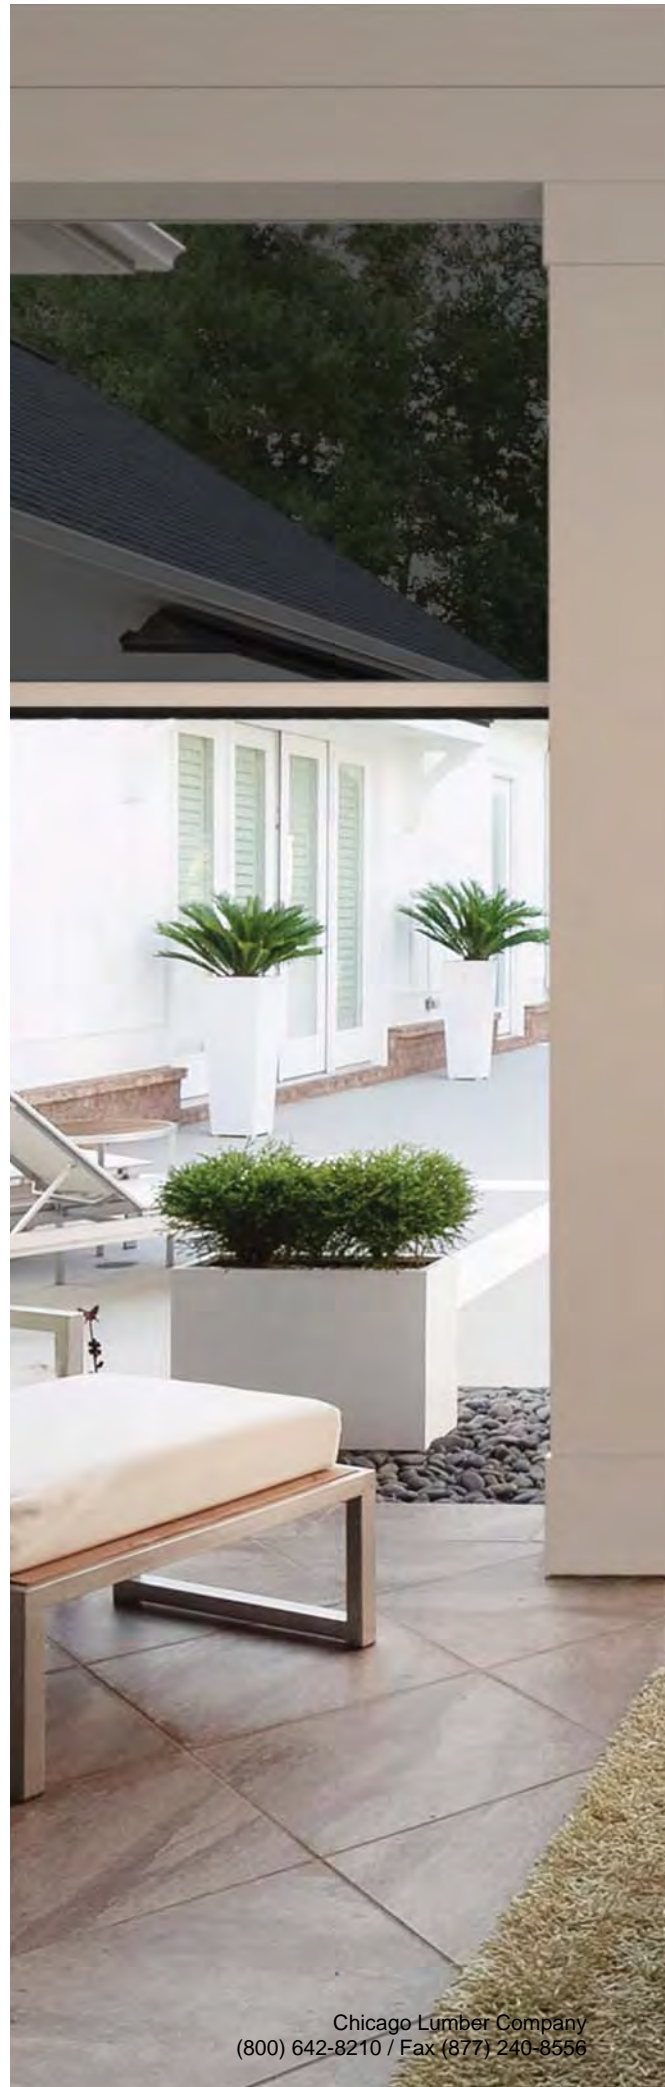

## SCREENS FOR YOUR WHOLE HOME

Larson screen products are designed to fit most existing door or window applications for the patio, lanai, garage, gazebo and front door. In addition to providing instant ventilation, retractable screens offer protection from airborne pests and harsh UV rays.

## RETRACTABLE SCREEN BENEFITS

Choose from a complete line of screens which includes options for single door openings as well as large openings up to 315" (26') wide. Available in trending colors and styles to complement your home.

- Protection from airborne, biting pests.
- Easy to install and operate.
- Smooth operation with controlled retraction.
- Supports fresh, natural ventilation.

# Find the Right Screen

Use this guide to find the retractable screen that fits your opening and meets your overall needs. Once you have narrowed down your selection, go to each product page for complete details.

# Brisa Retractable Screen Door

7721 (Single) 7722 (Double) 7723 (Slider)

## A FRESH APPROACH TO FRESH AIR

Open your home to a new world of fresh air and light with the Brisa retractable screen door that pairs smart, contemporary design with smooth operation.

## TOP BENEFITS

**Worry-free ventilation.** Screen provides bug-free air when you need it and retracts out of sight when you don't.

**Smooth operation.** The EZ-Glide System and ergonomic handle work together for easy, one-hand operation.

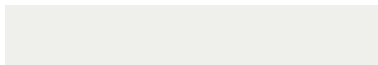

**30-minute install.<sup>1</sup>** Surface mount installation for right- or left-hand operation.

## ADDITIONAL FEATURES

- Durable rust-resistant aluminum housing and track provide long-term reliability.
- Subtle stripes prevent walk-throughs.
- Quick-snap track requires no cutting for standard size openings.

## FRAME COLORS

### SPECIFY WHEN ORDERING:

- A. Quantity
- B. Product Model Number
- C. Short, Standard, Tall
- D. Frame Color

- Mounts easily on a minimum 1" x 1" surface area.
- No cut, quick-snap track installs easily and adjusts to widths between 32" and 36" for single and sliding door applications, and between 68" and 72" for double doors.

**Note: If door is less than 32" wide (single) or 68" wide (double), two simple cuts are required.**

# Feature Overview

The Brisa retractable screen offers innovative features and smooth operation without compromising on style.

## ASSEMBLY

- Simple-to-install quick-snap track means fewer assembly steps and an easier installation experience.
- Speed reducer provides safety and controlled retraction.
- Fits both left- and right-hand inswing and outswing doors with no modification.

**30-minute or less installation.<sup>1</sup>**

## SCREEN FABRIC

- Anti-fraying double weave at the top and bottom of the screen fabric.
- Durable screen fabric with subtle safety stripes woven into the fabric provide faint visual cues to help prevent walk-through. Top stripes are for people and bottom for pets.

## HANDING

Adjusts easily to fit a left- or right-hand application.

## SMOOTH GLIDING, NO SLAMMING

Screen retracts all the way without assistance or banging.

## HANDLE

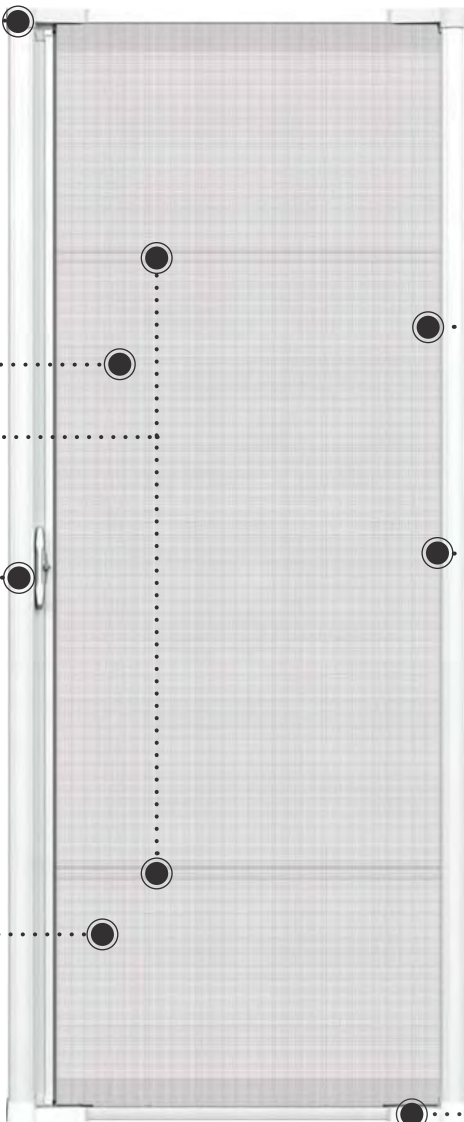

- Ergonomically designed handle with latch and lock offers simple and secure one-hand operation.
- Locking handle.
- Mechanical latch.

## STYLES

- Wide range of standard sizes, including 96" high doors.
- Telescoping width adjustment allows the screen to fit a range of opening widths.
- Stock sizes that fit most typical door sizes.
- Available in single door, double door and sliding patio door sizes.

## SILL PLATE

Aluminum sill plate with adjustable extenders (no gaps, blunt or sharp edges to step on).

## Additional Sizing & Application Detail

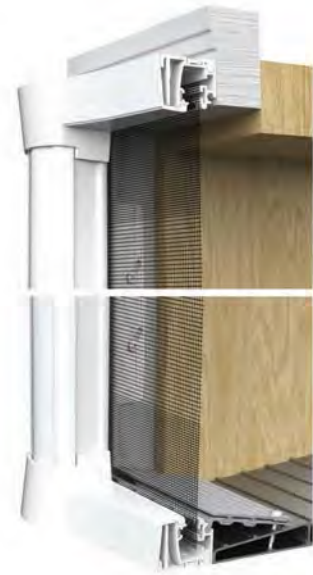

Shown below are the size ranges for Brisa single, double and slider options.

The Brisa screen for single- and double-panel hinged doors is surface / face mounted to the front surface of the door brickmould / trim (**see image**).

Doors, door frames and door sills vary by manufacturer. An advantage of surface mounting the Brisa screen is the ability to position it up or down in the opening to best fit the door frame before fastening in place. This makes the Brisa screen extremely versatile and able to fit multiple opening heights.

6'8" high door heights are the most common, however heights vary by geographic region. When installing on a single- or double-hinged door, a 3/4" or greater mounting surface depth is required inside the door frame. For 6'8" high sliding patio doors, refer to installation and mounting instructions.

**The Brisa retractable screen door is a surface / face mounted product. However, sizing is determined by door opening rather than the intended placement of the Brisa on the exterior door trim or brickmould. Measure for your Brisa by true opening size.**

Surface / Face Mounting on a Traditional Hinged Door.

DOOR TYPE	MODEL HEIGHT	FITS OPENING WIDTHS	FITS OPENING HEIGHTS	TIP-TO-TIP HEIGHT DIMENSIONS OF ASSEMBLED SCREEN HOUSING
Single	Short	32"-36"	78"-79" (e.g. 6'6" doors)	79"
Single	Standard	32"-36"	80"-81" (e.g. 6'8" doors)	81-3/8"
Single	Tall	32"-36"	96"-97" (e.g. 8'0" doors)	97-3/8"
Double	Short	68"-72"	78"-79" (e.g. 6'6" doors)	79"
Double	Standard	68"-72"	80"-81" (e.g. 6'8" doors)	81-3/8"
Double	Tall	68"-72"	96"-97" (e.g. 8'0" doors)	97-3/8"
Slider	Standard	32"-36"	78"-79" (e.g. 6'6" doors)	79-1/4"

- Two cuts required if less than 32" for single doors and 68" for double doors.
- Door designs and thresholds vary. It may be possible to position the screen upwards or downwards to fit an opening size not listed. In such cases, a filler board or trim may be needed. Doors with transoms above the door may also require a filler board or trim before or after installing the screen. Always ensure the bottom of the screen is firmly supported (**see page 62**).
- The Brisa slider fits most traditional 6'8" tall patio doors and includes different mounting hardware and a slightly shorter screen housing. This allows the system to rest in the opening as needed (**see page 66**).

# Screen Height Position on a Hinged Door

## TYPICAL INSTALLATION:

No filler board should be necessary. The unit can be moved up and down to fit the opening as desired.

## ALTERNATIVE INSTALLATION:

A filler board (trim) may be needed if the screen is positioned differently or if the opening height is outside of the recommended size range.

Mounts  
flush against  
brickmould.

Brickmould

Woolpile  
against  
the screen  
helps  
ensure  
the bugs  
stay out.

An adjustable sill plate  
provides a smooth  
transition, eliminating  
blunt edges and adding  
a polished look.

Filler board

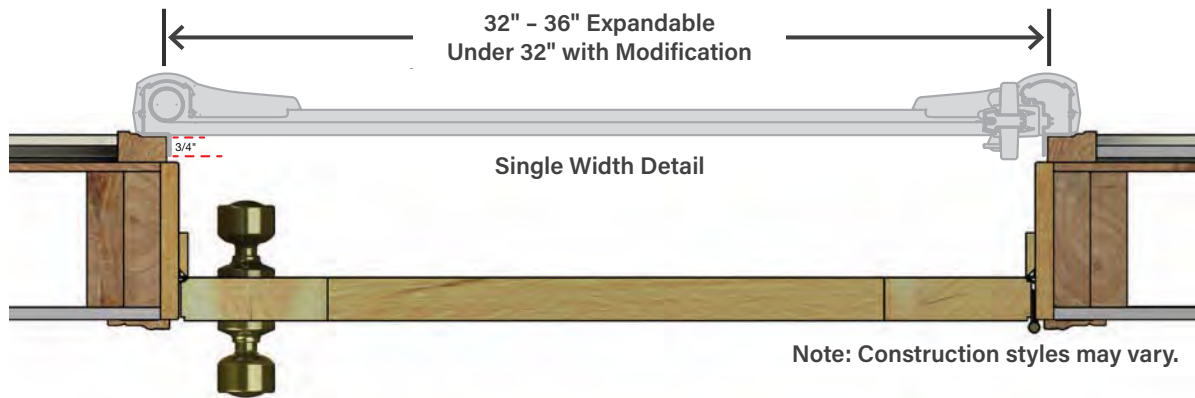

Sill extender slides to  
the edge of the door  
frame leaving no sharp  
corners or gaps.

# Screens for Single Panel Hinged Doors

Available in three heights — short, standard and tall — to fit most common doors.

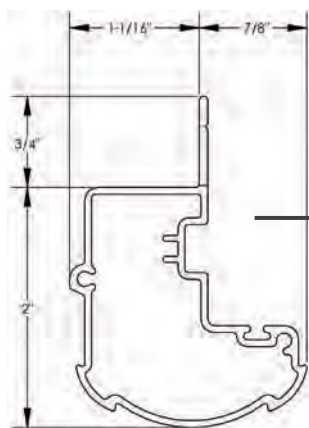

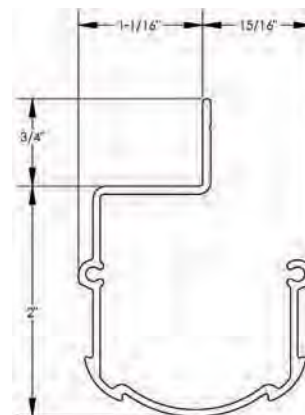

# Component Dimensions – Single Screen

A mounting flange is positioned 1-1/16" from the outer edge at the back of the screen housing and decorative housing.

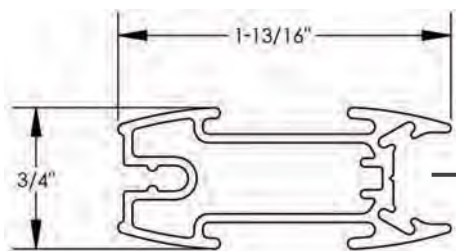

The mounting flange requires this 3/4" depth for mounting to the side brickmould / door trim.

Shown in Locked Position

# Screens for Double Panel Hinged Doors

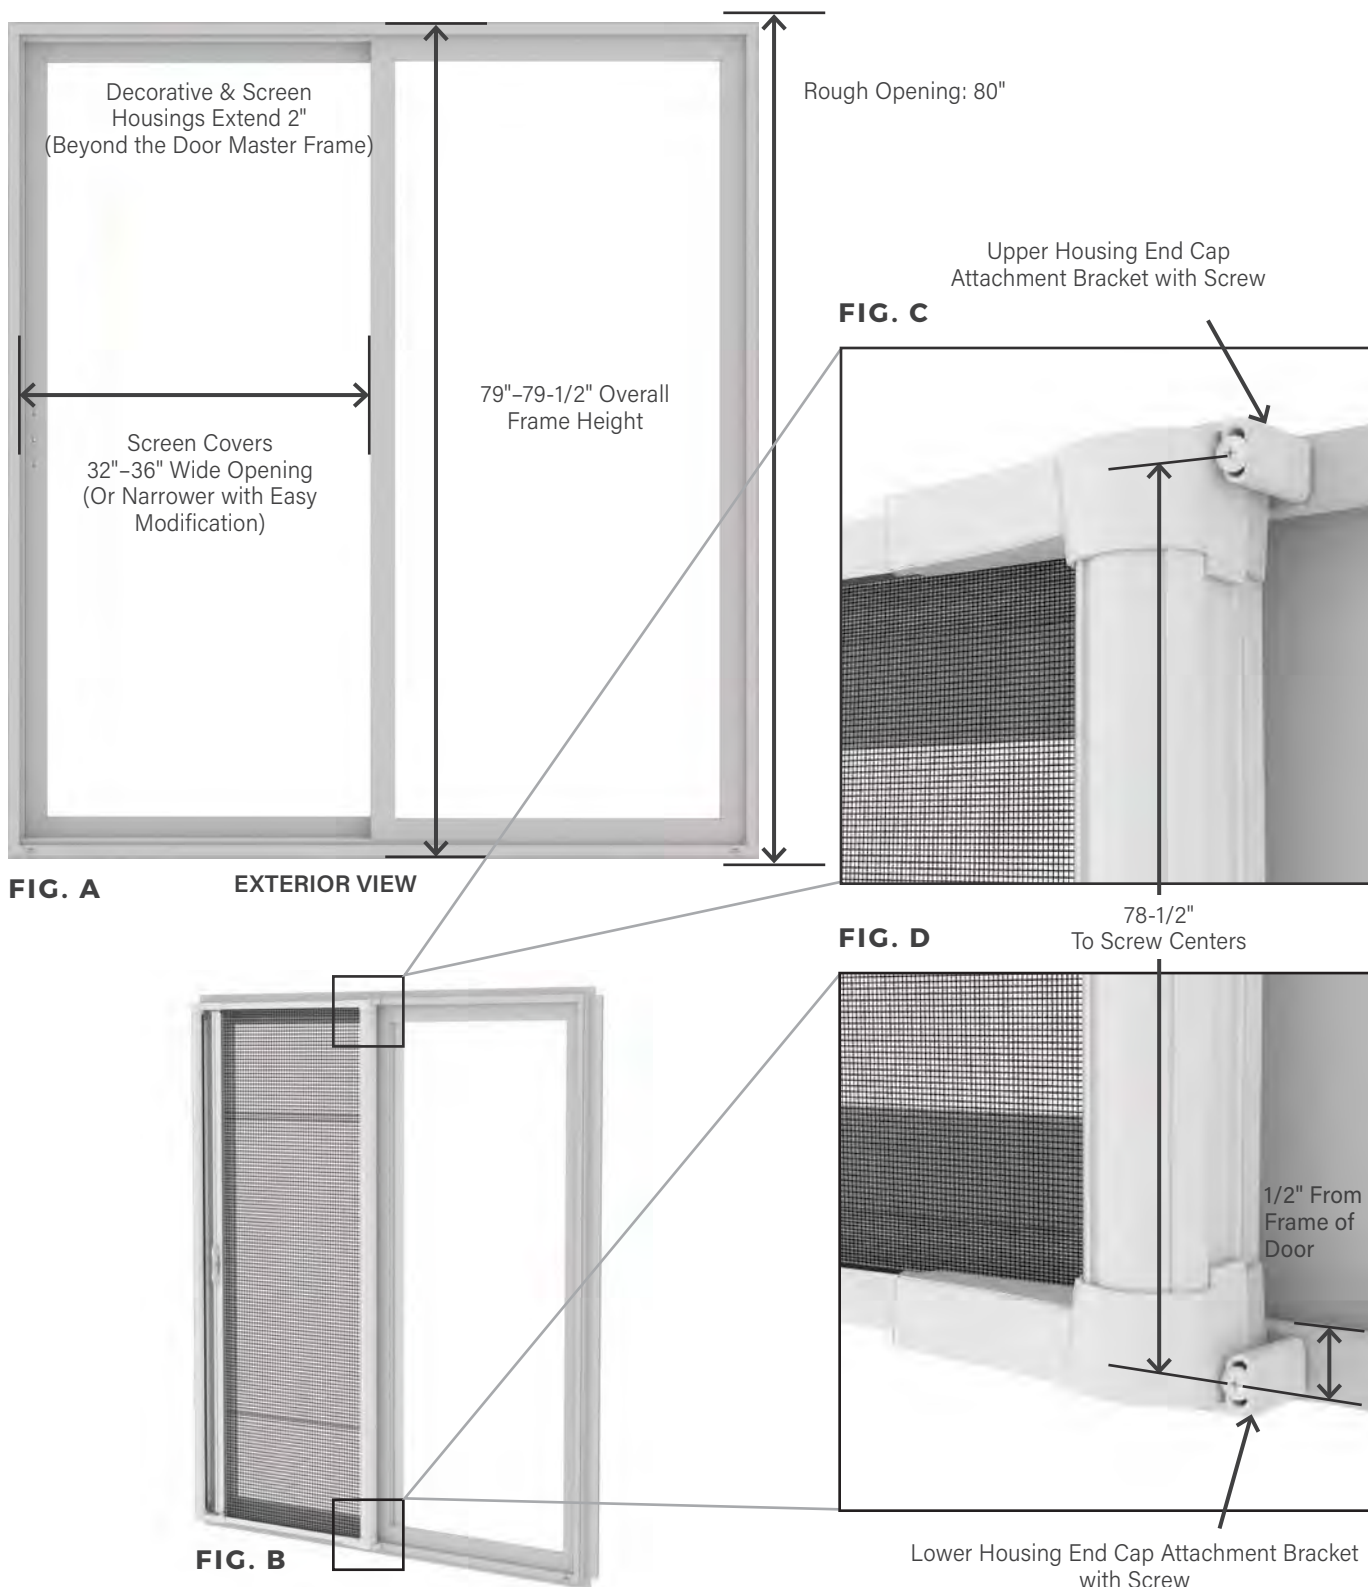

Available in three heights — short, standard and tall — to fit most common doors.

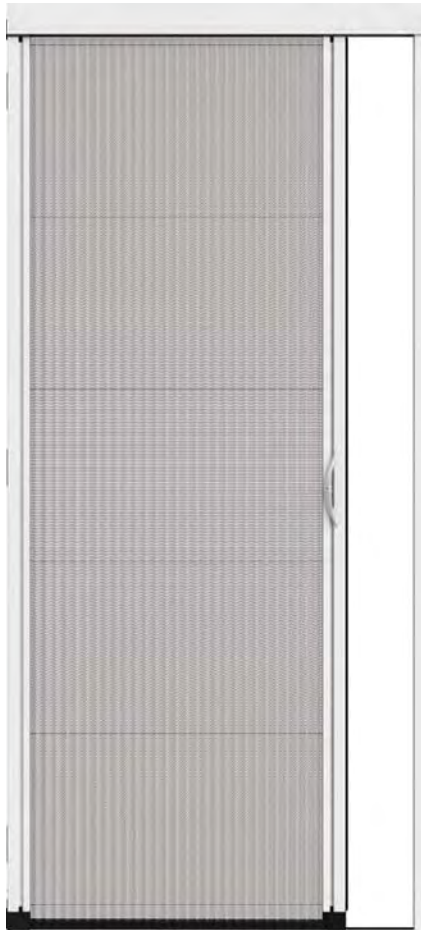

# Brisa for Sliding Patio Doors

The Brisa screen for single sliding patio doors is for use with traditional 6'8" high sliding patio doors. **(Fig. A)** This screen features unique mounting hardware and is specially sized so that the screen housing will rest and secure to the outer door frame. The door frame must have a surface to attach the mounting bracket screws. The distance between these screws is 78-1/2". **(See Fig. C & D)** Please see the following images and visit [larsondoors.com/screens/brisa-retractable-screens](http://larsondoors.com/screens/brisa-retractable-screens) to view the installation video and instructions.

# Inspire Pleated Retractable Screen Door

## SEAMLESS INDOOR-OUTDOOR LIVING

Create a smooth transition between indoor and outdoor living with the Inspire pleated retractable screen door.

### TOP BENEFITS

**Fresh style.** Elegant, pleated fabric provides ventilation with refined design.

**Unobstructed access.** The flat bottom guide installs without a runner for easy movement through the entry.

**Custom-made ventilation.** Designed to fit single and double doors and openings up to 31-1/2' wide and over 10' high.

### ADDITIONAL FEATURES

- Easily move and stop the screen at any position with one hand.
- Includes metal adjustable-height handles.
- Pre-assembled for easy installation without any cutting.

# Measuring Guide:

## SINGLE PANEL DOOR SCREENS

Applies only to Escape® and Inspire inside mount applications.

### Measuring a typical hinged door for the net screen opening dimensions.

Begin by deciding where best to position the screen. The opening must be plumb, level and square, and the bottom guide of the retractable screen must rest on a flat, level and solid surface. Make any needed adjustments to the opening (or plan and allow for shimming) before measuring for the screen. Determine the **net screen opening dimension** (width x height) as measured from the outermost edges of where the retractable screen will rest. Screens are then made to fit these dimensions. Manufacturing tolerances are **plus or minus 1/16"**. We recommend that with inside the frame installations (**options A or B**) that you **deduct an additional 1/16"** from the width and height dimensions that you submit in order to assure that the screen is not too tight in the opening during installation. If you plan on using shims or threshold transitions, be sure to also deduct appropriately for these. See the product model catalog pages and installation instructions for more detail.

#### COMMON INSTALLATIONS

- ☐ **OPTION A** Inside the Frame (Recess / Inset Mounted)
- ☐ **OPTION B** Fully Inside the Frame (Recess / Inset Mounted)
- ☐ **OPTION C** Outside the Frame (Surface / Face Mounted)

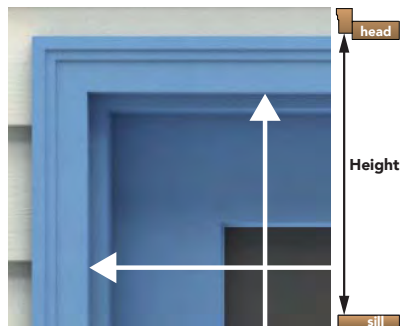

#### RECORD FINAL NET SCREEN OPENING DIMENSIONS

- Frame Color
- Net Screen Opening Size (Width x Height)

- Measuring & Installation: Designed to be installed within a framed opening (e.g. inset / recess mounted). 1-1/4" or deeper mounting surface required. Prior to measuring, be sure the opening is plumb, level and square and that the bottom guide has a flat, stable and smooth surface to rest on. Adjust the opening as needed.
- 2-piece top guide when over 180" wide.

**Note: Extended lead times may apply.**

Note: Larson retractable screens provide insect protection and support fresh, natural ventilation in low-wind conditions. Unlike 4-sided rigid framed screens, Larson retractable screens move in and out of a protective cassette and the exposed surface area and edges of the fabric are flexible. Consequently, the wind speed that a retractable screen can withstand (e.g. before the edges of the screen fabric may push out of the guide rails), will depend on the width and height of the opening, the material of the specific screen fabric and other design factors of the model. Retractable screens are not to be kept open or continually exposed to wind, rain or other harsh conditions. Please be sure to use your retractable screen only during low-wind conditions.

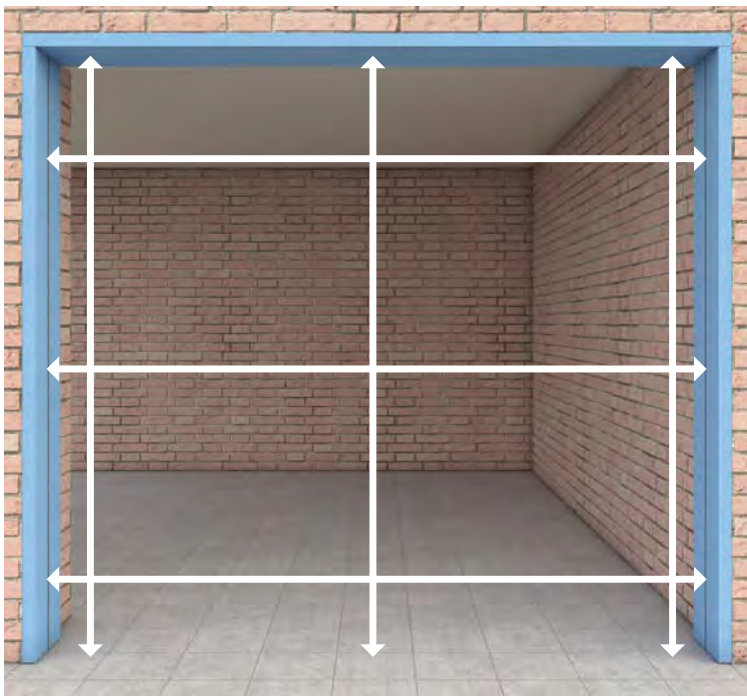

# Measuring Guide:

## WALL SCREEN AND INSPIRE (MULTI-PANEL) SCREENS

### Measure for the net screen opening dimensions.

Begin by deciding where best to position the screen. The opening must be plumb, level and square and, the bottom guide of the retractable screen must rest on a flat, level and solid surface. Make any needed adjustments to the opening (or plan and allow for shimming) before measuring for the screen.

Determine the **net screen opening dimension** (width x height) as measured from the outermost edges of where the retractable screen will rest. Screens are then made to fit these dimensions. Manufacturing tolerances are **plus or minus 1/16"**. Because of this, we recommend that you **deduct an additional 1/16"** from the width and height dimensions that you submit in order to assure that the screen is not too tight in the opening during installation.

### RECOMMENDED INSTALLATION TYPE

**Inside the Frame Installation**  
(Recess / Inset Mounted)

### RECORD FINAL NET SCREEN OPENING DIMENSIONS

W \_\_\_\_\_

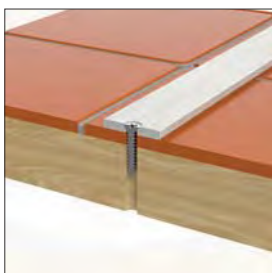

H \_\_\_\_\_

(Deduct 1/16" from the width and height to order).

### BEFORE YOU MEASURE

Before measuring, ordering and installing the screen, ensure that the opening is plumb, level and square and that the bottom of the opening has a flat, stable and smooth mounting surface. If needed, add a metal strip or other material (sourced elsewhere), to create a suitable surface for mounting the bottom guide rail of the retractable screen.

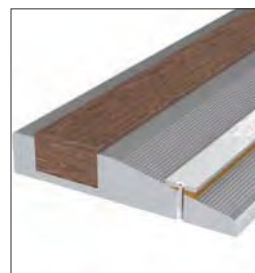

### EXAMPLES

Uneven Tile Floor

Aggregate Cement Floor

Angled Door Sill

## Retractable Motorized Screen

Models 6+, 7+, 8+, 9+, 10+

### ENJOY THE VIEW IN COMFORT

Protect against insects, debris, sun, heat and wind with the Larson® Retractable Motorized Screen and its selection of five purpose-built screens that fully retract for an unobstructed view.

### TOP BENEFITS

**Effortless operation.** Conveniently raise and lower the screen with the push of a button on the remote – or let the automatic sun-wind sensor adjust the screen to match the weather.

**Engineered endurance.** The edge of the screen fabric is sonic welded to heavy-duty zipper tracks, sealing gaps on all sides and providing extra durability.

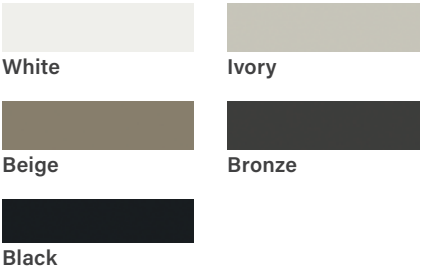

**Custom-made solutions.** Designed to fit openings up to 20' wide and 12' high, depending on screen type.

Note: See your Larson seller or visit [larsondoors.com](http://larsondoors.com) for details on available product sizes and options. Product finish colors are approximate; actual finish colors may vary. This is a motorized screen, which requires a separate power source to operate. The screen will not move up or down without power. We recommend that you purchase a backup power supply. Windy conditions may affect the performance of the screen. Retract the screen in windy circumstances, during inclement weather and when not needed to support immediate ventilation or prolonged periods of time when not used. Not intended to keep pets or children inside. This product contains one or more devices that comply with UL standards for electrical safety and with part 15 of FCC Rules for radio frequency devices.

# Insect Screens

Experience outdoor living without the bugs. Insect screens safeguard against airborne pests and are made of durable, vinyl-coated polyester that resists tears and punctures.

## TUFFSCREEN.

Protects against airborne pests.

## TUFFSCREEN. NO-SEE-UMS

Protects against even the smallest airborne pests with a tighter weave.

Round up to next foot for accurate pricing (e.g. a 10'1" w x 8'2" h opening would be 11' w x 9' h).

## HAND-HELD REMOTES (All Remotes Are Purchased Separately)

Somfy 1 Channel Remote [Item 1810643] (Controls 1 screen.)	\$105.00
Somfy 5 Channel Remote [Item 1810645] (5 Channel controls up to 5 screens or groups of screens.)	\$131.25
Somfy 16 Channel Remote [Item 1811081] (16 Channel controls up to 16 screens or groups of screens.)	\$392.70
Somfy Situo 5 Soliris Sun Sensor 5 Channel Remote [Item 1870579] (Required to activate Sun Sensor option.)	\$216.30

## HD BOTTOM BAR (Option for 7+ and 9+ Models)

Under 155" in Width	\$263.55	Somfy Sun & Wind Sensor [Item 9012500]	\$445.20
Over 155" in Width	\$527.10	1" x 2" Angle (For use when inside mounting the screen.)	\$94.50

## BOTTOM BAR SEAL REPLACEMENT PARTS

Standard 1.5" Brush (Black)	\$10.50/Yard	2" x 2" Angle (For use when inside mounting the screen.)	\$218.40
Standard 2" Brush (Black)	\$32.55/Yard	Custom Frame Color (Standard RAL)	\$1,086.75
4" Rubber Seal (White, Black, Gray, Bronze, Ivory, Beige)	\$6.30/Foot		
4" Rubber Seal (Black or Gray)	\$14.70/Foot		

Note: For items sold by foot or yard measurements, round up to the next even foot or yard.

Chicago Lumber Company  
(800) 642-8210 / Fax (877) 240-8556

# Heavy-Duty Bottom Bar

Available for upgrade on 7+ and 9+ models for extra wind resistance. Standard on 10+ model.

## Screen Controls

Conveniently raise and lower the screen with the push of a button on the remote; or let the automatic sun-wind sensor adjust the screen to match the weather.

### SOMFY. REMOTE CONTROLS

Simultaneously operate up to 16 screens with the push of a button.

- 1 Channel controls 1 screen.
- 5 Channel controls up to 5 screens or groups of screens.
- 16 Channel controls up to 16 screens or groups of screens.

### SOMFY. SUN-WIND SENSOR (Optional)

Automatically lowers up to 16 screens during intense sunlight and raises them during heavy winds.

## PROFILES

Diagrams show models 6+ or 8+. Measurements are in inches.

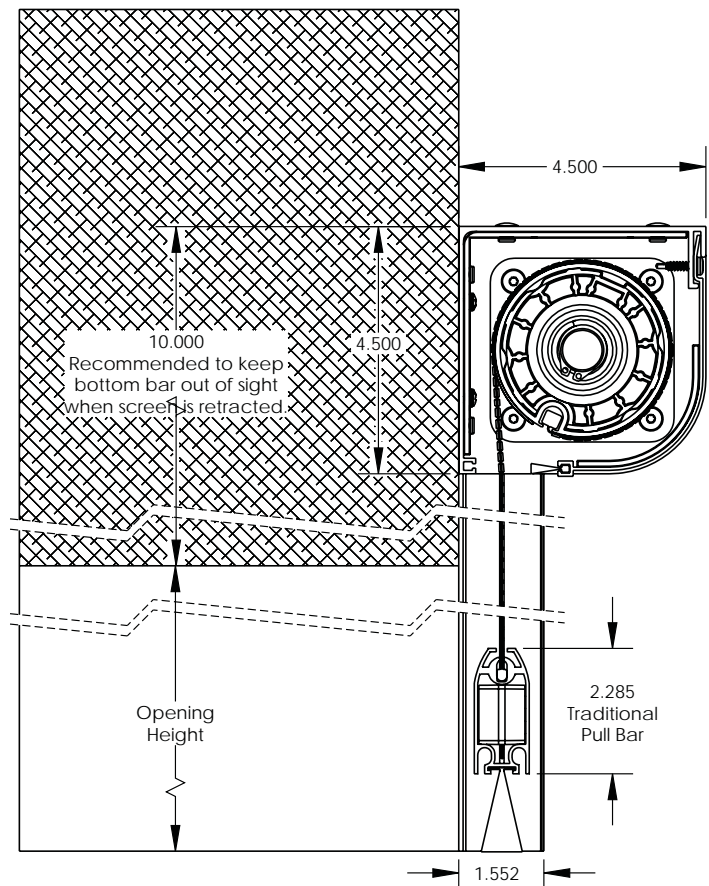

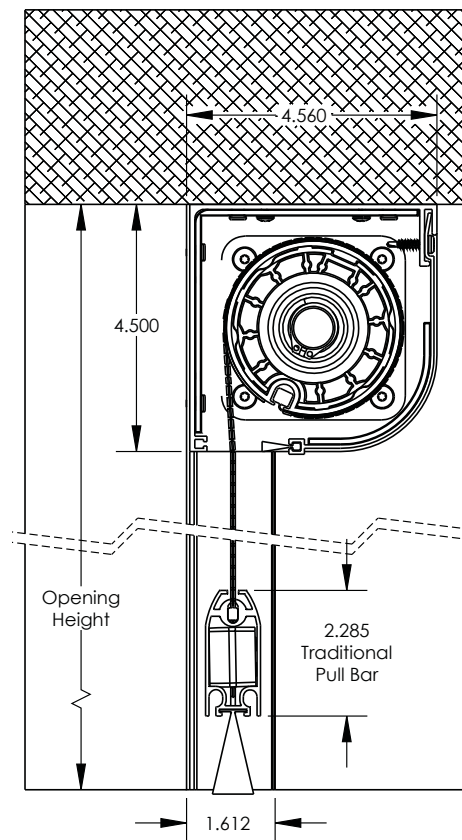

### Inside Mount

Scan the QR code to watch the installation video. These instructions describe an **inside or recessed** mount installation.

### Outside Mount

Scan the QR code to watch the installation video. These instructions describe an **outside or surface** mount installation.

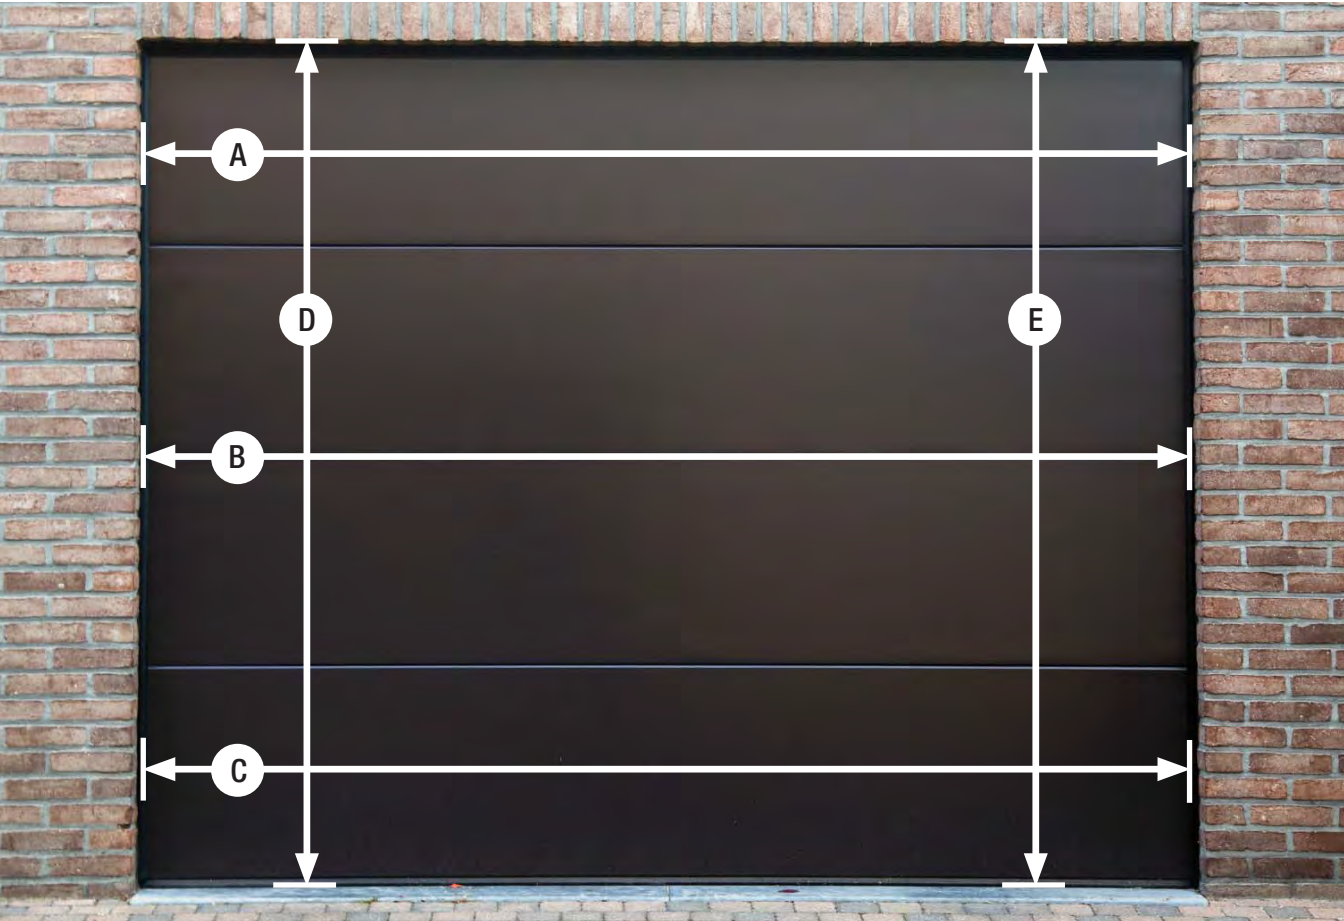

# Measuring Guide:

## RETRACTABLE MOTORIZED SCREEN - INSIDE MOUNT

Use these instructions to measure your opening for an inside mount motorized screen.  
Supply the final width and final height when ordering.

Measure distances **A**, **B** and **C** in inches and record below. Take the narrowest measurement and **subtract half an inch:**  
This is your final width.

<b>A</b>	Width	<b>B</b>	Width	<b>C</b>	Width	Final Width	
----------	-------	----------	-------	----------	-------	-------------	--

Measure distances **D** and **E** in inches and record below.  
The highest measurement is your final height.

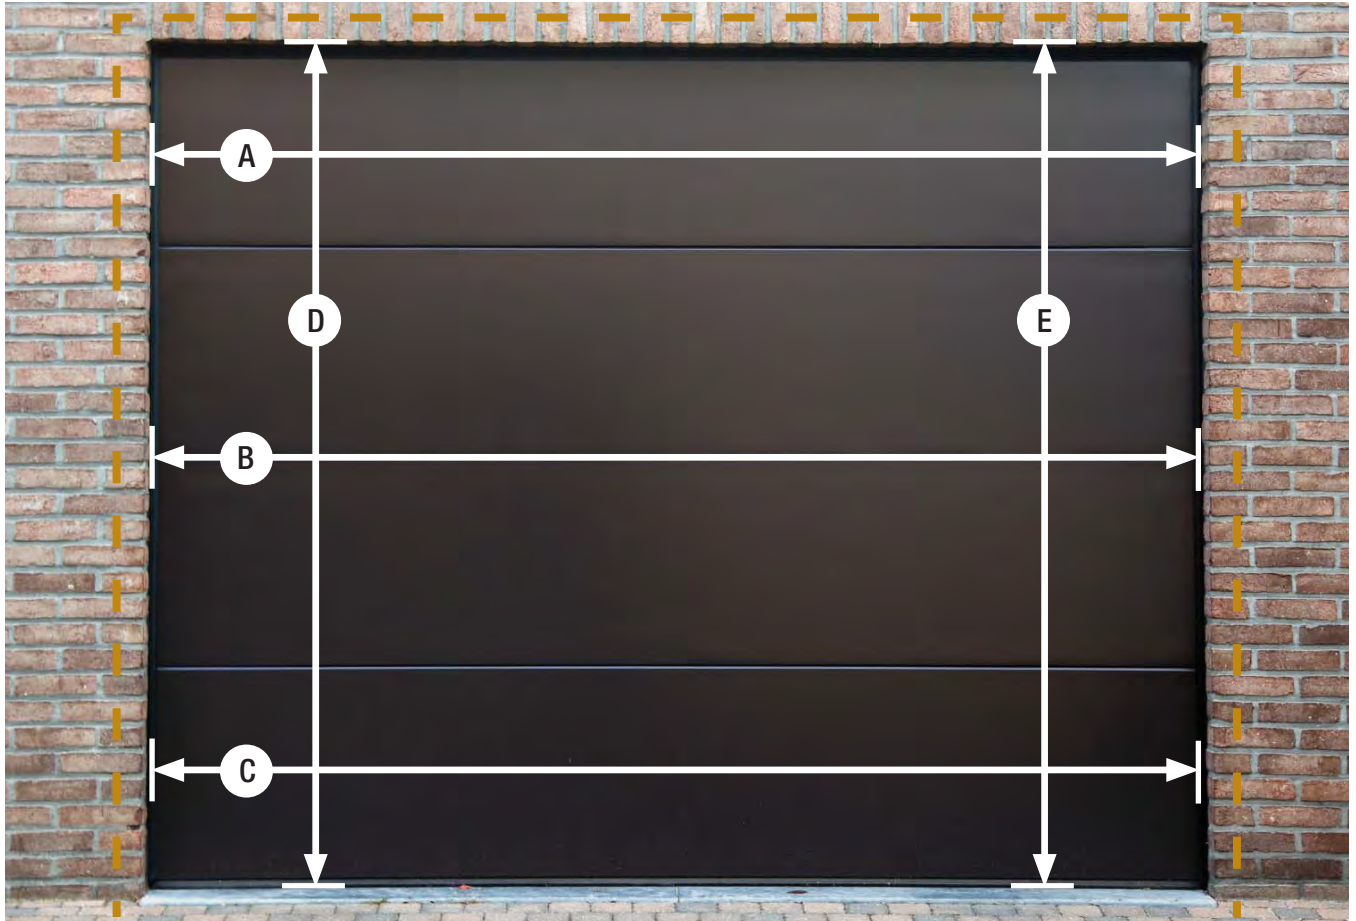

<b>D</b>	Height	<b>E</b>	Height	Final Height	
----------	--------	----------	--------	--------------	--

# Measuring Guide:

## RETRACTABLE MOTORIZED SCREEN - OUTSIDE MOUNT

Use these instructions to measure your opening for an outside mount motorized screen.

Supply the final width and final height when ordering.

Measure distances **A**, **B** and **C** in inches and record below. Take the widest measurement and **add 5 inches**:

This is your final width.

Note: This will allow for the screen to be outside mounted without infringing on the daylight opening.

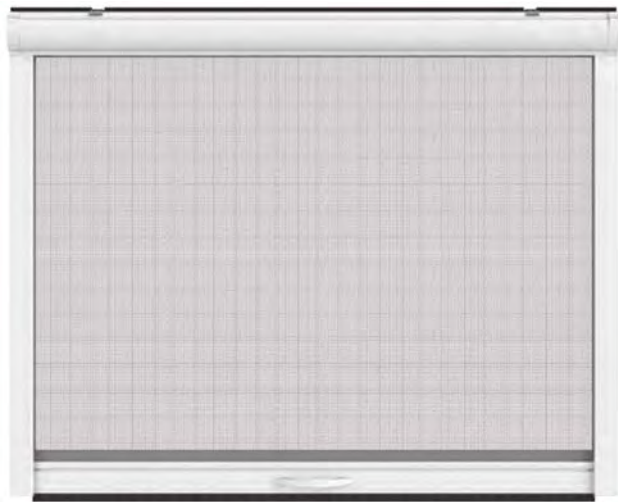

<b>A</b>	Width	<b>B</b>	Width	<b>C</b>	Width	Final Width	
----------	-------	----------	-------	----------	-------	-------------	--

Measure distances **D** and **E** in inches and record below. Take the highest measurement and **add 10 inches**:

This is your final height.

Note: This will allow for the housing and bottom bar to rest above the opening without infringing on the daylight opening. If there is a header, ceiling or other obstruction above the opening, you can add less than 10 inches to create the final height. However, this will cause the screen to infringe on the daylight opening.

<b>D</b>	Height	<b>E</b>	Height	Final Height	
----------	--------	----------	--------	--------------	--

# NatureVue Retractable Window Screen

NatureVue NV100

## FRESH AIR IS ALWAYS IN REACH

Transform every window into an opportunity for ventilation using the NatureVue retractable window screen.

### TOP BENEFITS

**Worry-free ventilation.** Screen provides bug-free air when you need it and retracts out of sight when you don't.

**Custom-made ventilation.** Designed to window openings up to 72" wide and up to 90" high.

### ADDITIONAL FEATURES

- Features a durable finish and BetterVue® fabric.
- A speed reducer provides controlled vertical retraction.
- Thick insect pile seals out insects.
- Includes a metal handle.
- Designed for easy recessed or surface mount installation.

# Measuring Guide:

## RETRACTABLE WINDOW SCREEN

### Measuring for the net screen opening dimensions of a retractable window screen.

There are many different window frame designs and operation types, each with their own mounting requirements. Before measuring, determine the screen placement that will provide the best stability, operation and appearance. Window frame stylization and decorative mouldings may require that you install shims so that the screen can be installed in a stable, plumb and level manner.

Begin by determining the **net screen opening dimension** (width x height) as measured from the outermost edges of where the retractable screen will rest (**see image A**). Screens are then made to fit the net screen opening dimensions. We recommend **deducting an additional 1/16"** from the width and height dimensions in order to assure the screen is not too tight in the opening during installation.

All window screen orders **default to inside the frame (recessed) mounting** unless specifically noted that the screen will be used for **outside (surface) mounting**. When outside (surface) mounting a window screen, please note the type of mounting and then provide the net screen opening dimensions as defined as:

- Width: The tip-to-tip measurement of the final assembled screen cassette (**see image A**).
- Height: The measurement from the outermost edge where the screen cassette will rest to the tip of the side guide rail end cap (**see image A**).

The following illustrations show how to measure the net screen opening dimension of a retractable window screen.

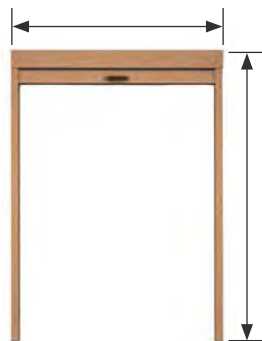

Image A

Image B

The NatureVue retractable window screen can be installed in one of two orientations so that the protruding area of the cassette faces away (most typical – **see image C**), or toward the window frame (**see image D**). The most typical way is for the protruding area of the cassette to face away from the frame. However, it can be useful to reverse the orientation of the cassette for aesthetic reasons or to avoid existing window hardware. For further detail, refer to the Larson installation instructions for the retractable window screen model.

# Retail Hardware

## Pneumatic Door Closers

Designed for outswing metal, wood or composite storm and screen doors.

### HEAVY-DUTY CLOSERS

#### CH1020306 & CH1020506

(Case of 6)

Measuring 12-5/8" center hole to center hole and 1-1/2" in diameter, the heavy-duty closer is built for single-closer use on medium- and heavy-weight doors. Includes mounting brackets and attaching hardware.

### STANDARD-DUTY CLOSERS

#### CH1040306 & CH1040506

(Case of 6)

Measuring 12-5/8" center hole to center hole and 1-1/4" in diameter, the standard-duty closer is built for single-closer use on light- and medium-weight doors or for dual-closer use on heavy doors. Includes mounting brackets and attaching hardware.

### STANDARD-DUTY CLOSERS WITH HOLD-OPEN FEATURE

#### CH1030306 & CH1030506

(Case of 6)

Measuring 12-5/8" center hole to center hole and 1-1/4" in diameter, the standard-duty closer is built for single-closer use on light- and medium-weight doors or for dual-closer use on heavy doors. Hold-open feature offers a hands-free way to keep the door open. Includes mounting brackets and attaching hardware.

# Sales Policy

## Order the easy way at: [larsondoors.com/dealer](http://larsondoors.com/dealer).

For fast, convenient ordering, use the Larson Easy Ordering system. Enter orders on your own time with immediate confirmation of costs, freight information and ship dates. To get started, visit [larsondoors.com/dealer](http://larsondoors.com/dealer) and provide an email address along with business name, address and contact information. Or, email your account information to: [webdealers@larsondoors.com](mailto:webdealers@larsondoors.com).

---

### EMAIL & TELEPHONE ORDERS

1. Orders will be processed as given. Larson Manufacturing Company, LLC will not be held responsible for errors on email or phone orders.
2. An email confirmation of the order will be sent within a few hours. Please verify the information and call with any changes.
3. Review the order carefully. Orders for custom products may not be modified or canceled once they have been placed. Other orders may be canceled within the first 24 hours.

**Note:** Prices shown in this catalog are Larson List Prices.

---

### SHIPPING & HANDLING

#### Ground Delivery:

Shipping and handling charges may apply. All products included.

---

### RETURNS

**For material shortages, errors, or damaged or defective product, please notify our office immediately.**

Pre-authorization of returns for credit is required for all standard size doors and subject to a 15% restocking charge. If product is returned on a carrier, a freight charge may also be assessed. Do not deduct any credits on returned merchandise from the invoice when remitting. Credit memos will be issued from our corporate office.

**Note:** Once placed, custom door orders cannot be canceled. For warranty questions please visit [larsondoors.com/warranty](http://larsondoors.com/warranty).

**Dealer Line: 1-800-334-1328**  
**Homeowner Helpline: 1-888-483-3768**

# Special project? We've got you covered.

Our team is ready to assist with your special requests, custom product orders and volume buys. Price quotes on all Larson® products are available for special building projects. Minimum quantities may apply. Stock replenishment excluded.

## BULK & SPECIALITY ORDERS

To receive quotes for large quantity and specialty orders, email: [quotes@larsondoors.com](mailto:quotes@larsondoors.com)

## STANDARD ORDER QUOTES

To receive quotes for non-specialty, low-volume orders, email: [dealerdirect@larsondoors.com](mailto:dealerdirect@larsondoors.com) or call: 1-800-334-1328

## Helpful Resources

### Warranty Documents

Enjoy with confidence. Find complete product and component warranties by scanning the QR code or visiting [larsondoors.com/warranty](http://larsondoors.com/warranty).

Warranty Documents

### Measuring Guides

Get the right fit. Use the measuring guides at the end of each product section to order the correct size for your project. Follow the index on the next page to quickly find the right guide. Find additional information about measuring for storm doors at [larsondoors.com/storm-doors/storm-doors-how-to-measure](http://larsondoors.com/storm-doors/storm-doors-how-to-measure).

### Replacement Parts

Missing or broken part? Find a replacement in pages 92–95 or order online at [parts.larsondoors.com](http://parts.larsondoors.com).

### Customer Service

Need help? We have the expertise and resources to help you with all your product, installation or warranty questions. Visit us at [larsondoors.com/support](http://larsondoors.com/support) to explore our library of resources or to talk to us directly by phone or chat.

Effective February 1, 2013

**LP<sup>®</sup>**  
BUILDING PRODUCTS

## GENERAL PRODUCT INFORMATION

**LP Moulding** offers an affordable alternative to wood, with all of wood's beauty, as well as the benefit of ease of installation. It is the right choice for all repair and remodel jobs and equally good for new construction. LP Moulding is moisture and insect resistant, and doesn't require sanding, priming, painting or sealing. It won't warp, rot, splinter or split. Every piece is manufactured using strict tolerances for consistent size, color and grain pattern. A description of the 6 available collections is listed below.

**All Stock and non-Stock profiles are available in full cartons only. Special orders to be pooled with the next available Chicago Lumber Stock order. 3-4 week lead time.**

### PREFINISHED

**The Ultra™ Collection** replicates the look of hand-finished oak or maple at a fraction of the cost. The polystyrene substrate is laminated with a rich woodgrain design. It is available in 12 profiles and 6 colors -- see the pricing page for color and profile options.

**The Crystal White™ Collection** offers your customers a complete floor-to-ceiling moulding line with an extensive selection of 33 prefinished white profiles and two pre-packaged door trim kits.

**The Crystal White™ Accessories Collection** is a system of intricately designed architectural mouldings (6 profiles), corner blocks (5 varieties) and plinth block (1). Installation is eased by eliminating the need to miter or cope.

**The Affinity® Collection** comes in 12 profiles with a satin finish in four warm woodgrain hues that range in appearance from bleached wood to dark honey (Natural, Amber, Autumn, Mahogany). This mid-priced line meets the demands of decorators, do-it-yourselfers and remodeler customers.

**The OakTrim Collection** offers your customers a woodgrain moulding option that is high in value and versatility at a low cost. The OakTrim Collection is offered in 10 full size Colonial profiles and is available in one color -- Honey Oak.

**The Cameo™ Collection**, an economical solution for ranch and traditional style homes, includes 16 profiles in two colors -- Auburn and Russet.

**The ProPerfect™ Collection** is a factory-finished MDF moulding. It is designed for professionals and homeowners wanting a superior finish with less labor.

## Garage Door Frames

- Pro Series (all aluminum frame) available in 90° & 45° corners. The all aluminum frame is also available as an Arch Top. These frames come KD and are individually packaged. (Optional 1x4 add on casing and J-Mould).
- Builders Series (aluminum clad over wood), available in 90° & 45° corners, Crownline or Brickmould nosing. (Optional 1x4 add on casing and J-Mould).
- The arch top frames are only available in the pro series crownline casing.
- Packaging is durable to eliminate damage in shipping. The frames are pre-packaged with all installation hardware and full color instructions.
- Readily available in 10 standard colors. Black and Arctic Silver are not available for Pro-Series and Arch Top.
- Pro Series offers proven performance with the no rot all aluminum frame, very easy to install with heavy duty corner gussets. The gusseted corners give a perfect miter and strength for efficient field assembly.
- Builders Series offers a maintenance free frame with 16 gauge extruded aluminum. The bottom 6" of the frame is treated to eliminate water wicking. The corners have alignment pins to give a perfect miter.

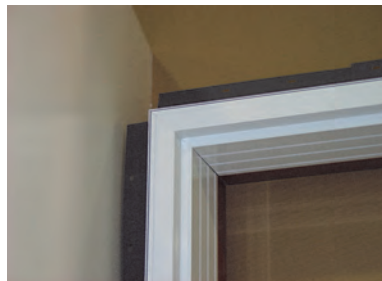

**Pro Series**

**Builder Series**

**45° Corner**

**90° Corner**

**Arch Top**

### Ordering Garage Door Frames:

1. **Choose Product Design Type (Pro-Series or Builders Series)**
  - 90° Corners, 45° Corners or Arched Top
2. **Choose Trim Style**
  - Standard Crownline casing
  - Optional J-Mould that converts the casing to Brickmould
  - Optional 1x4 Trim Board add on casing
  - Standard Brickmould Casing Available with Builders Series
3. **Determine Size(s)**
  - Frame size is Determined by size of garage door. Example: 9x8, 16x7, 12x12
4. **Confirm Jamb Depth**
  - Typical 2x4 construction = 5-1/2" jamb
  - Typical 2x6 construction = 7-1/2" jamb
  - Most jamb depths can be accommodated
5. **Confirm Rough Opening**
  - Add 3" to the width & 1-1/2" to the height of door size
6. **Choose Color**
  - 10 Standard Colors (Pro-Series)
  - 12 Standard Colors (Builders Series)

### Installation Instructions for Garage Door Frame Cladding (Stock Cut)

Clad comes partially pre-cut for the garage door opening size. It is required to make one miter cut on the header, and also to cut floor angle off bottom of both verticals. To cut aluminum use a compound miter saw with a compound cut. For best results use a metal cutting blade with a five degree negative hook.

Figure #1:

Example of cladding for a 9' x 7' garage door frame. The Verticals are 7'3" pre-mitered with 3" left on length to cut floor angle. The Header is 9'6" pre-mitered on one end with opposite end left 6" longer to be cut in field to fit door header width. A miter cut is required on this end.

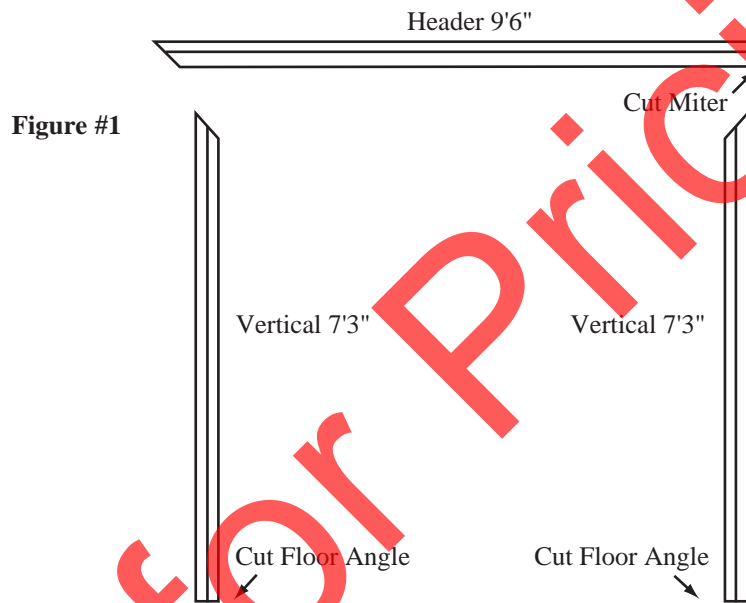

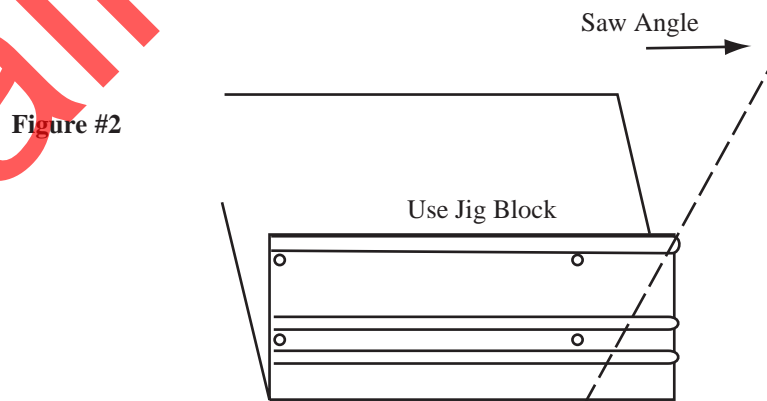

Figure #2:

Jamb cover must be miter cut using a jig block to support the aluminum angle of the jamb cover and to reduce saw blade chatter
